PROFESSIONAL SUMMARY

Results-driven AI and Machine Learning Engineer with an MSc in Artificial Intelligence and Machine Learning from Vellore Institute of Technology (VIT) and a Bachelor of Computer Application. Proficient in Python, machine learning model development, deep learning, and data analysis using Pandas, Scikit-learn, and TensorFlow. Experienced in building real-time ML applications with demonstrated accuracy above 84%. Seeking an entry-level role or internship in AI/ML, data science, or software development to apply strong analytical and problem-solving skills in a technology-driven organization.

EDUCATION

Master of Science – Artificial Intelligence and Machine Learning	2025-2027
Vellore Institute of Technology (VIT), Vellore, Tamil Nadu CGPA: 7.23 (Ongoing)	
Bachelor of Computer Application (BCA)	2022-2025
Voorhees College, Vellore, Tamil Nadu CGPA: 7.71	

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS, React.js

Machine Learning & AI: NumPy, Pandas, Scikit-learn, TensorFlow, Deep Learning, Convolutional Neural Networks (CNN), Computer Vision, OpenCV.

Database: MySQL

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Cloud Platforms: Amazon Web Services (AWS)

PROJECTS

Emotion-Based Music Recommendation System

Tech Stack: Python, OpenCV, TensorFlow, CNN, Deep Learning

- Designed and developed a real-time facial emotion recognition system using Convolutional Neural Networks (CNN), achieving 84% classification accuracy across 7 emotion categories.
- Integrated a mood-based music recommendation engine that dynamically maps detected emotions to curated song playlists.
- Implemented live webcam video inference using OpenCV, optimizing the pipeline for low-latency, real-time performance.
- Preprocessed and augmented a facial expression dataset to improve model generalization and reduce overfitting.

NLP Sentiment Analysis Dashboard

Tech Stack: Python, HuggingFace Transformers, BERT, Streamlit, Plotly, Pandas

- Developed a real-time NLP sentiment analysis dashboard using BERT (cardiffnlp/twitter-roberta-base-sentiment) to classify product reviews into Positive, Negative, and Neutral categories with 91%+ accuracy.
 - Built an automated text preprocessing pipeline handling CSV/Excel uploads with auto column detection, URL removal, and noise cleaning for improved model accuracy.
 - Designed 4 interactive Plotly visualizations including donut chart, bar chart, box plot, and histogram for real-time sentiment trend analysis.
 - Deployed on Streamlit Cloud with batch BERT inference, sentiment filtering, KPI cards, and downloadable CSV results.
-

CERTIFICATIONS

Anthropic

- Claude – Anthropic (Apr 2026)
- Google Vertex AI – Anthropic (Apr 2026)
- Amazon Bedrock – Anthropic (Apr 2026)
- Model Context Protocol: Advanced Topics – Anthropic (Apr 2026)
- Introduction to Model Context Protocol – Anthropic (Apr 2026)
- Introduction to Subagents – Anthropic (Apr 2026)
- AI Fluency: Framework & Foundations – Anthropic
- AI Fluency: AI Capabilities & Limitations – Anthropic

Google Cloud

- Google Cloud Computing Foundations Certificate – Google Cloud Skills Boost
- Prompt Design in Vertex AI (Skill Badge) – Google Cloud Skills Boost
- Develop GenAI Apps with Gemini and Streamlit (Skill Badge) – Google Cloud Skills Boost

Oracle & Cybersecurity

- Oracle Cloud Infrastructure Certified Foundations Associate – Oracle
 - Demystifying Cyber Attacks – Workshop Certificate, Tutelr
